

Pro Edger (with Edger Sharpening Rod)

« How to sharpen »

- ① place the sharpening rod on the desk
 - ② place the water-resistant paper over sharpening rod positioning your fingers at both ends (see diagram)
 - ③ sharpen the blade (keeping it flat on the surface) by pulling the tool backwards so that you don't damage the blade
- * After using the tool, you can maintain the sharpness of the blade by lightly coating tip with oil.
